## PROFILE

Full-stack software engineer with **3 years of professional experience** building web, CLI and mobile products. Spent the last two years in an English-speaking international team at a German company as a core developer of the ARA project management software – React frontend, backend / API, Python CLI and **LLM-agent-based code generation infrastructure**. Previously shipped React Native apps and published a personal Flutter app on both stores. Double degree in Computer and Electrical & Electronics Engineering, bringing an understanding of both software and hardware.

## TECHNICAL SKILLS

|                   |                                                                                   |
|-------------------|-----------------------------------------------------------------------------------|
| Languages         | JavaScript, TypeScript, Python, Dart, Java, C, C#                                 |
| Frontend & Mobile | React, React Native (iOS / Android), Flutter (Riverpod, Provider), HTML, CSS, Pug |
| Backend & Tooling | API development, CLI tooling, Python (pydantic, pandas)                           |
| AI / LLM          | LLM agents, pydantic_ai, litellm                                                  |
| Cloud & DevOps    | Git / GitHub, AWS, Firebase (Auth, Firestore, Storage, Cloud Messaging)           |
| Other             | OpenCV, Tkinter, pygame, MATLAB, embedded C (STM32), Raspberry Pi                 |
| Spoken Languages  | Turkish (Native) • English (C1 – Advanced)                                        |

## PROFESSIONAL EXPERIENCE

- Talsen Team GmbH** – Full-Stack Software Engineer Freilassing, Germany • Jul 2024 – Jul 2026
- Core developer of the **ARA project management software**: React frontend, backend / API and the Python **ara-cli** tool.
  - Integrated frontend, API and CLI into one coherent system and took full responsibility for their development.
  - Built **LLM-agent-based code generation infrastructure** fully integrated into ARA to automate development workflows.
  - Worked in an international team with English as the daily working language, following a strict agile process.
- SameUp** – Mobile Application Developer (Intern → Part-time) Istanbul • Jul 2023 – Jul 2024
- Led the UI/UX overhaul of the **Kidokit** app, implementing a new design language across 20+ core screens in React Native.
  - Co-developed the **Investag** investment tracking app from scratch, building 14+ key features and reusable components.
  - Prototyped upcoming frontend updates for the **Teknosa** website using Pug.

## PROJECTS

- Tarif Atölyesi** – Recipe-Sharing Mobile App Flutter • Riverpod • Firebase
- Published on Google Play and the App Store; users share recipes, dish photos and ingredients.
  - Implemented likes and user follows, state management with Riverpod and data storage with Firebase.
- Barcode Reading System** – Graduation Project Python • OpenCV • Raspberry Pi
- Camera-based barcode reader with an **OpenCV** pipeline (thresholding, erosion, dilation) and **EAN-13** decoding.
- Bluetooth-Controlled Smart Vehicle** Flutter • STM32 • C
- Flutter app controlling STM32 firmware (C) over Bluetooth, with automatic obstacle-based command override.
  - Brought hardware, firmware and the app together with teammates into one working system, strengthening my **teamwork** skills.

## EDUCATION

- B.Sc. Computer Engineering** (Double Major) 2021 – 2025  
*Fatih Sultan Mehmet Vakif University – Istanbul, Türkiye*
- B.Sc. Electrical and Electronics Engineering** (30% English-medium • GPA 3.00 / 4.00) 2020 – 2024  
*Fatih Sultan Mehmet Vakif University – Istanbul, Türkiye*
- Erasmus+ Exchange – Electrical and Automation Engineering** (taught in English) Jan 2023 – Jun 2023  
*Klaipėda State University of Applied Sciences – Klaipėda, Lithuania*

## ADDITIONAL INFORMATION

**Activities:** New Generation R&D – Board Member; My University Lecture Notes Mobile Application – Moderator
